

Most Asked Interview Questions

DAX

20 Most Commonly Asked DAX Calculations in Interviews

1. Total Sales

Total Sales = SUM(Sales[SalesAmount])

2. Total Profit

Total Profit = SUM(Sales[Profit])

3. Profit Margin %

Profit Margin % = DIVIDE([Total Profit], [Total Sales], 0)

4. Distinct Customers

Distinct Customers = DISTINCTCOUNT(Sales[CustomerID])

5. Average Sales per Customer

Avg Sales per Customer = DIVIDE([Total Sales], [Distinct Customers], 0)

6. Total Orders

Total Orders = COUNT(Sales[OrderID])

7. Average Order Value

Avg Order Value = DIVIDE([Total Sales], [Total Orders], 0)

8. Cumulative Sales (Running Total)

Cumulative Sales =

CALCULATE(

```
[Total Sales],  
FILTER(  
    ALLSELECTED(Date[Date]),  
    Date[Date] <= MAX(Date[Date])  
)  
)
```

9. Sales Last Year

Sales LY =

```
CALCULATE(  
    [Total Sales],  
    SAMEPERIODLASTYEAR(Date[Date])  
)
```

10. YoY Growth %

YoY Growth % =

```
DIVIDE([Total Sales] - [Sales LY], [Sales LY], 0)
```

11. Sales Previous Month

Sales PM =

```
CALCULATE(  
    [Total Sales],  
    PREVIOUSMONTH(Date[Date])  
)
```

12. MoM Growth %

MoM Growth % =

```
DIVIDE([Total Sales] - [Sales PM], [Sales PM], 0)
```

13. Sales for Selected Category

Food Sales =

CALCULATE([Total Sales], Sales[Category] = "Food")

14. Top 5 Products by Sales

Create a calculated table:

TopProducts =

TOPN(5, SUMMARIZE(Sales, Sales[ProductName], "TotalSales", [Total Sales]), [Total Sales], DESC)

15. Customer Retention Flag

Is Returning Customer =

IF(CALCULATE(COUNT(Sales[OrderID]), ALLEXCEPT(Sales, Sales[CustomerID])) > 1, 1, 0)

16. % of Total Sales

% of Total Sales =

DIVIDE([Total Sales], CALCULATE([Total Sales], ALL(Sales)), 0)

17. Rank by Revenue

Sales Rank =

RANKX(ALL(Sales[ProductName]), [Total Sales], , DESC)

18. Customer Churn %

Churn Rate =

DIVIDE([Lost Customers], [Total Customers Last Month], 0)

19. Time to First Purchase

First Purchase Date =

CALCULATE(
 MIN(Sales[OrderDate]),
 ALLEXCEPT(Sales, Sales[CustomerID])
)

20. IF + SWITCH for KPI Color Logic

KPI Status =

```
SWITCH(  
    TRUE(),  
    [Total Sales] >= 1000000, "Green",  
    [Total Sales] >= 500000, "Yellow",  
    "Red"  
)
```
